

## APMC Plastic Card News

Sysco's IMA-1500H was exhibited at Cards Asia 2003.

## Cards Asia 2003 Overview

It was held on July 23-25, 2003 in Singapore. Spanning over 6,000 square meters, with over 150 leading card solution providers, presenting machinery, appliances, systems, software and accessories for card solution.

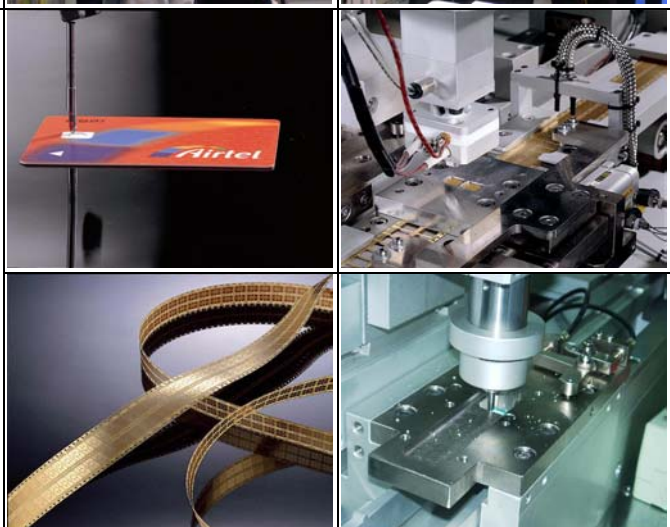

## Sysco in Cards Asia 2003

With Viccard as our partner in Singapore, (Booth 4D18), we displayed the IMA-1500H machine, which is used for milling and chip implanting of plastic cards. There were many visitors from Singapore, Malaysia, Indonesia, India, Taiwan, Hong Kong, Philippines and China. Sysco's specific goal is to develop a total solution for IC Chip smart card for the future.

## IMA-1500H feature

The IMA-1500H is a fully automatic milling and chip implanting system for chip or smart cards such as telephone cards, bank credit cards, GSM cards, ID health care cards, etc. The IMA-1500H uses hot melt bonding to implant the chip. The IMA-1500H is manufactured in a modular way so that it is easy to replace the hot melt.
