

# Automatic Die-Cutting Press and Feeding Systems

***The Cutting Force***

# INCREASE YOUR PROFIT AND PERFORMANCE WITH APMC CUTTING SYSTEMS

• *SAVE MATERIAL* • *REDUCE LABOR* • *INCREASE PRODUCTIVITY*

**USA - ABR 40**  
**Abrasive Disc Cutting System**

Cutting Force 40 tons\*  
Computer control  
Knockout and stacking system  
Suitable for jumbo rolls

**USA - 100**  
**Automated incremental feed  
slide table**

Cutting Force 100 tons\*, 250mm stroke  
two side safety tunnel  
Suitable for sheet material and  
foam material

**USA - 60**  
**Manual incremental feed slide table**

Cutting Force 60 tons\*  
Hinged table stand with bevel block  
Used for loose dies placed on top of material  
without any bending of cutting dies

# INCREASE YOUR PROFIT AND PERFORMANCE WITH APMC CUTTING SYSTEMS

• *EXTEND DIE-LIFE* • *ASSURE CUTTING QUALITY*

## **USA - 40**

### **Clamping beam cutting on belt**

Cutting Force 40 tons\*  
Manual 4 post mechanical stops  
Suitable for roll material or in-line die cutting

## **USA - 100**

### **Cutting against steel plate**

Cutting Force 100 tons,\* 250mm stroke  
Inboard pinch roll and conveyor belt feed system  
Outboard pinch roll and conveyor belt feed system  
Motorized 4 post mechanical stops  
Suitable for sheet material and foam planks and rolls

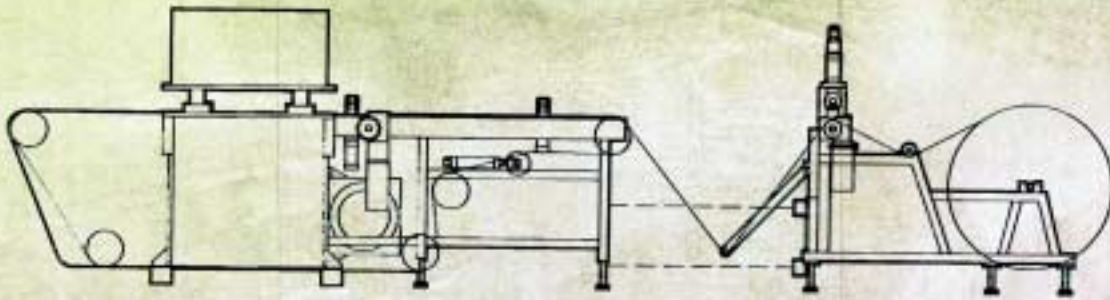

## **USA - 100**

### **Double motorized feed tables**

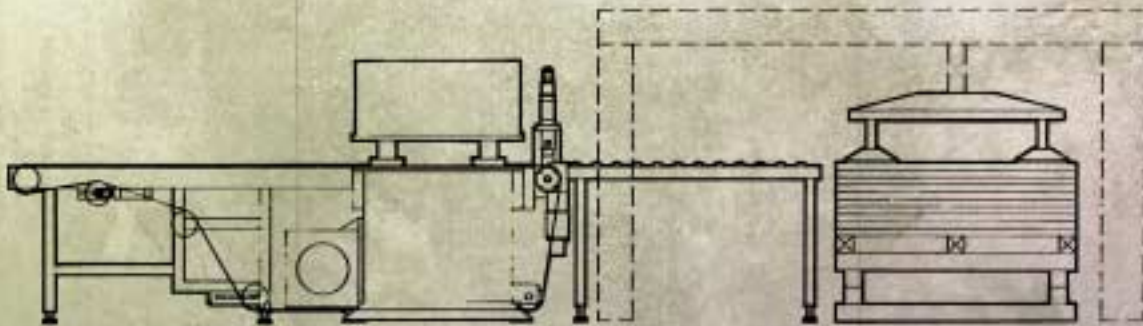

Cutting Force 100 tons\*  
Dual die height controls

\* All cutting forces are metric tons. For U.S. equivalent, add 10%

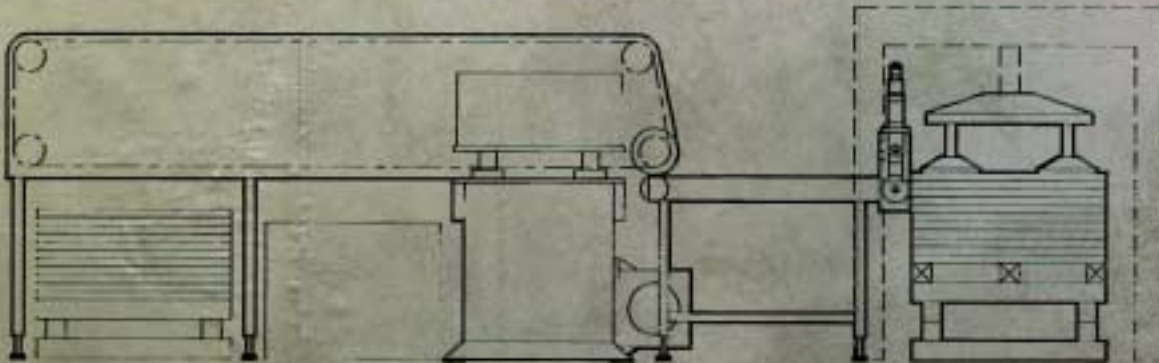

## SOME OTHER SYSTEMS

- Clamping beam cutting on belt system linked to material unwinder, extruding machine, rubber mixing system, etc.

- Inboard pinch roll cutting on belt system with auto loading

- Chain feed cutting against steel plate with auto loading and auto knock out system
