Swing Arm Clicking Machines (APM-SA27)

Regularly Kept In Stock - The Swing Arm Clicker Press features 27 tons of tonnage available, a 20" x 40" cutting table, and a beam width of 20".

Features

The swing arm clicker is the workhorse for many die cutting applications and also a very capable entry-level machine. We are proud to offer the Associated Pacific Machine APM-SA series of Swing-Arm Clicking Machines. Whether you are looking for an additional cutting machine, a replacement for an old machine, or you are looking to get started in the die cutting industry, the APM-SA27 is the perfect machine for your needs.

Advantages

- Automatic stroke-end setting-up to use cutting knives of different heights without any adjustment
- Control push buttons with built-in device for 3/10 of a second maximum delay operation to ensure positive safety.
- Seven different models all have main control organs covered by international patents.
- All models can be supplied in the CE version, that is equipped with the safety devices requested by the EC-rules 89/336/CEE and 89/392/CEE.
- Higher speed of operation and greater productivity which can increase material yield.
- Reduced wearing of cutting dies and a dramatic increase in savings on cutting pad costs.

Range of Applications

- Manual die cutting of materials such as foam, textiles, plastic, rubber, packaging, vinyl, leather, composites, fiberglass, cork, wood, gasket materials (non-asbestos, teflon, etc.) and more.
Options

Machine Options

- Machine Crating Charge – When machine is shipped via a common carrier.
- Extra White Cutting pad – 20” x 40” x 1” thick
- Convert Machine to Accept Single Phase Power
- Rotary Phase Converter
- 24” wide Aluminum Striking Plate (19 5/8” x 20” x ¾”)
- 2mm Steel Wear Plate on the Bed and 10mm Cutting Pad Mounted on the Head
- CSA approved components installed – APMC will replace non-CSA approved components with CSA approved components (motor, wire, electrical components, etc.)
